Applied Mathematics - the next volume

Filesize: 6.81 MB

Reviews

Simply no words to spell out. It can be rally fascinating throgh studying period of time. You will not really feel monotony at at any moment of your own time (that's what catalogues are for concerning if you ask me).

(Dr. Isabella Turner)

APPLIED MATHEMATICS - THE NEXT VOLUME

To read **Applied Mathematics - the next volume** PDF, remember to access the web link listed below and save the file or have access to other information that are related to APPLIED MATHEMATICS - THE NEXT VOLUME ebook.

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment.Pages Number: 245 Publisher: Beijing University of Technology Press Pub. Date :2009-1-1. This book based on ability to build the main line professional curriculum and teaching content. the guiding ideology. and strive to implement to apply for the purpose of necessary and sufficient for the degree of principle. ensuring the scientific attention on the basis of clarifying the concept. to reduce the theory to prove. focusing on the students basic computing and analytical problem-solving abilities. particularly in both the preparation of each module MathCAD mathematical software to solve a math problem content. breaking the vocational college students to learn math bottleneck reflects the characteristics of higher vocational education teaching. This book is divided into upper and lower two. the book includes one yuan calculus. linear algebra. probability theory and mathematical statistics and other three parts. a module is divided into _ Bu; the next volume of content. including differential equations. multi-function differential science. infinite series. discrete mathematics and mathematical culture five parts. is divided into nine modules. namely: vector algebra and analytic geometry of space. multi-function differential calculus. double integral. differential equations. Laplace transform. infinite series. mathematical logic. graph theory. introduction and history of mathematics and mathematical culture. The basic book about 110 hours of teaching hours. Classes and vocational institutions for Engineering Economics and Management students of different levels of learning or teaching materials as a reference. Contents: Module twelve vector algebra and analytic geometry of space vector and linear operator Section II vector and vector multiplication Section V plane and curved linear IV plot with MathCAD differential module over thirteen yuan function Section II study multi-function partial derivatives of the third quarter of the total differential fourth...
