Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. Excerpt: .is carried by it to the right side of the heart and thence to the lungs, a certain quantity, however, escaping from the blood through the kidneys and skin. A small and insignificant amount of oxygen is introduced into the blood through the skin, and, with the food, through the alimentary canal; but, as we have stated in the beginning of this chapter, respiration is the main process by means of which the body is supplied with oxygen and relieved of carbonic acid. The respiration and circulation are profoundly and intimately connected together, any change in the blood immediately affecting the respiration. i This process of oxidation may be illustrated by the burning of a fire; the oxygen which is in the air combines with the carbon of the wood, heat and light are generated, and oxidized products in the form of carbonic acid and ashes produced....
